Check for Mistakes in this Word Problem: circle-area

Directions: Write a function that returns the area of a circle given its diameter.

Contract and Purpose Statement																
Eve	Every contract has three parts															
; circle-area :						number					-	\rightarrow		number		
_	function name			domain									range			
;	Takes	es the diameter of		a circle		and	and calculates			e a	area	bу	multip	nultiplying		
what does the function do?																
R	Example	es														
Wr	ite some exa	mples, th	nen circle and labe	el what	chang	ges										
(EXAMPLE		(ci	circle-area			10		(*	(sqr	(/	10	2))	pi)	,)
			input(s)				what the function				oduces				_	
(E	EXAMPLE	(ci	rcle-area			50)	(*	(sqr	(/	50	2))	pi)	,)
			input(s)				what the function				oduces					
Γ	Definitio	n														
Wr	ite the defini	ition, giv	en variable names	to all y	vour in	ıput values										
()	define(area		diameter											
	•	f	function name		ν	variables										
		(* (sqr diamete			er) pi))	
						what the f	imation door	with those	vaniables							

what the function does with those variables
