Check for Mistakes in this Word Problem: late-to-class?

Directions: You will be late to class if you have to walk more than 25 pixels to get there. Write a function that takes in your x-coordinate and y-coordinate and the x-coordinate and y-coordinate of the classroom and returns true if you will be late to class and false if you will be on time.

Contract and Purpose Statement

Every contract has three parts														
; late-to-class? :	number number number number											boolean		
function name	ame domain								_			range		
; Takes the coorindates	of r	ny loca					an	nd returns	tru	ıe i	f th	e distance	is ı	more
what does the function do?														
Examples														
Write some examples, then circle	e and i	label wha	t changes											
(EXAMPLE((late-to-class?	40	5) (> 2	5	(distance	40	55	65	80)))
function name inp					what the function						on produces			
(EXAMPLE((late-to-class?	40	5!) (< 2	5	(distance	40	55	65	80)))
function name			input(s) what the fund						tion produces					
Definition														
Write the definition, given variab	e nam	es to all y	our input va	lues										
(define(late-to-class?	stı	udent-x	student-y	/ sch	ool-x	scl	100	ol-y)						
function name			vari	ables										
((< 25 (distance	stude	ent-x st	tudent-y	school	-X S	cho	ol-y	'))))		
			what the function	nn does w	th those	varia	hles
