Check for Mistakes in this Word Problem: scale-image

Directions: Write a function which takes an image and a string, representing what to scale the image by. The function should return a smaller image if the string is 'smaller' and a bigger image if the string is 'bigger'.

		se Statement					
Every contract has t	three parts						
; scale-image : imaç			string		\rightarrow	image	
function name do			omain		<u> </u>	range	
; Make the im	age bigger	or smaller, depend	ing on the gi	ven string			
		what	does the function do?				
Examples							
Write some example	es, then circle a	and label what changes					
(EXAMPLE(scale-image	e (circle 5 "solid	" "red") "bigge	er") (circle	10 "solid"	"red"))
	function name	inp	out(s)		what the function pr	roduces	
(EXAMPLE(scale-triangl	e (triangle 20 "s	olid" "blue") "s	smaller")			
	function name		input(s)				
(triangle 10	"solid" "blue"))
_	what the	function produces					
Definition							
Write the definition,	given variable	names to all your input va	lues				
(define(scale	e-image	original-image scale	e-factor)				
func	ction name	variables	 `				
(cond							
		_					
[(string=	=? scale-fac	ctor "bigger")	(scale 2 or	iginal-image)]
[(string:	=? scale-fac	ctor "smaller")	(scale 0.5	original-imag	je)]
[else:	original-ima	age					1))
